Brainstorm & Idea Prioritization

Project: Calculating Family Expenses Using ServiceNow

This document outlines the brainstorming process and idea prioritization for building a ServiceNow-based family expense tracker. It focuses on identifying key features, evaluating them based on impact and feasibility, and selecting ideas that deliver the most value within technical and time constraints.

Brainstormed Features

1. Automated expense entry via email or forms

2. Monthly and yearly spending dashboards

3. User roles for each family member

4. Real-time expense notifications

5. Category-based budgeting (e.g., groceries, bills, entertainment)

6. Mobile-friendly interface

7. Integration with bank APIs

8. Spending limit alerts

9. Downloadable reports (PDF, Excel)

10. Recurring expense scheduling

Idea Prioritization Table

#	Feature	Impact	Feasibility
1	Automated expense entry via email or f...	High	Medium
2	Monthly and yearly spending dashboards	High	High
3	User roles for each family member	Medium	High
4	Real-time expense notifications	Medium	Medium
5	Category-based budgeting	High	High
6	Mobile-friendly interface	High	Medium
7	Integration with bank APIs	High	Low
8	Spending limit alerts	Medium	Medium
9	Downloadable reports	Medium	High
10	Recurring expense scheduling	Medium	High
